

KansasNet is a full-service Internet Service Provider (ISP) focusing on providing Kansas businesses, residents, and government agencies with high-quality Internet-based services at competitive prices.

KansasNet's network is monitored 24 hours a day, 365 days per year. Telephone and e-mail based technical support are available to all of our customers, and custom support packages are available for individuals and organizations with extended support needs.

In order to meet the demand for services in a wide and complex market place, we employ some of the best and brightest representatives of various computer disciplines. Our staff consists of certified computer service and repair technicians, network specialists, programmers, an administration team, and an expert sales & marketing team, all working to provide the best internet and computing solutions to our customers.

Feel free to contact our staff if you have any questions about the information contained on this website.

In conjunction with [Fox Business Systems](#) (our Computer Solutions Provider partner, please visit www.webuildsolutions.com !!!), we are able to provide computing solutions from your finger tips, into your workstation, through your network to the rest of the globe via the Internet.
