BOOKS

The Osage Orange Static Recurve:

This book was designed for the beginner, or novice, who is interested in building his or her own bow from the live tree to the finished product. There have been many trials and errors in the development of this book, which the reader will be able to avoid.

While primarily intended for the individual who has never built their own bow, it also contains information, which will be helpful to the more experienced bowyer, particularly those who have never built a Static Recurve.

I hope it will be of help for those who seek the written knowledge of what I have acquired through trial and error. Good luck and happy bow building.

Cost \$ 10.00

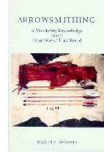

Arrowsmithing: A workable knowledge from primitive too traditional is designed to provide the arrow builder with practical information on the complete construction of wooden and reed arrows using both traditional and primitive methods.

Some of the topic covered includes shaft selection, nock, point, and fletching application, crests, crowns, and finishes.

Also included in a detailed description of the construction of arrows using only primitive material and tools.

In all, Arrowsmithing will provide the reader with the means to create arrows, which are as functional as they are beautiful.

Cost \$ 10.00

TAPERED QUIVERS

Custom leather tooling and carving is my specialty

My quivers are made of the highest quality tooling or oil tanned leathers. Specify leather type when ordering. Tooling is available on both types of quivers. On the oil-tanned quivers, the tooling is available on tooling leather and these are laced or sewn onto the oil-tanned quiver. The design of this tooling leather is an arrowhead. Oil tanned quivers have anywhere from a 2" to 6" wide leather band sewn around the top of the quiver with 2 to 3 diamond shaped cut outs or 2 arrowhead cut outs with snake skin or contrasting leathers underneath for beauty. All quivers can have the top 2 to 3 inches lined with kodel. \$20.00 extra, specify.

PAPA: Large size
Length 22"

Circumference: 18" with pouch.
Tooled: \$250.00
Un-tooled: \$ 120.00
