By STAFF

Our school newspaper was put together by Justis Condray (Editor), Max Peterson, Wilson Wichman, and Abigail Willroth. We wanted to share a little about ourselves.

This is for you if you don't know much about me. I am the oldest student in my school at the age of 14. Things I like are video games, eating (my favorite food is pizza), and watching movies/TV. My favorite shows are *Prison Break* and *The Flash*. My favorite colors are red and black. My favorite animals are penguins. My name is Justis Condray.

Have you ever been to Kauffman Stadium? I have been there to see my favorite sports team, the Kansas City Royals. I'm Wilson Wichman a seventh grader at the Green Christian School. There is only one other person in my grade. I have three siblings; I live in Green Kansas.

“Aaaabby, Anna has your markers!” I hurried down the old wooden steps. It wasn't my fault that Anna had my markers. I

hadn't left them out... I just simply forgot to put them away. Who could judge me? I love to draw. I love a lot of things, mostly things involving writing. Writing books, writing songs. Sometimes I write poems. I'm thirteen. I have eight siblings, and I LOVE green. Well, I think that's about all, now if you'll excuse me, I have a marker thief to catch.

The 8th grade is a hard life, but it's either that or the dumb life. Hello there, I'm Max Peterson, and I'm going to teach you about myself. I am the youngest among four children in my family. I live in Leonardville, Kansas. In school, I like to do math. I like video games and movies. I am funny. My favorite food my mom makes is hamburger and beans.

We just wanted to share a little bit about us. We hope you learned something.

Suggested Donations

School Supplies:

- Forever stamps
- Washable paint
- Brooms (2)
- Ladder (6ft.)
- Dry erase markers
- White board erasers
- Paper products
- White copier paper
- Business envelopes
- Kleenexes
- Staplers
- Tape Dispenser

Other Considerations:

- General fund
- Bequest of will
- Sponsor a child's tuition
- Certificates of deposit
- Life insurance
- Gift annuities/charitable trust
- Prayer and financial support

We appreciate your prayers and support

Field Trip to the Kansas Capitol

By WILSON WICHMAN

Guess who were pages at the Capitol on March 9, 2017, with about twenty other pages? They were Justis Condray, Max Peterson, Wilson Wichman, and Abigail Willroth. We went on a quick tour of the Capitol upon arrival. A page runs errands for their sponsor, and meets needs they have. During the actual paging, there were only two errands to run for the whole Republican side, which was where we sat.

Photo taken by Mrs. Chris Brinkman

Something I learned was that whoever has the majority in the house gets to sit on the left side of the room, because it is warmer. It's warmer because the sun rises and shines in the

windows. There were democratic pages too. Kansas Republican representative, Susie Swanson, sponsored us and provided a pizza lunch. We took a tour of the dome which has 296 steps to the top. Abigail and the teachers were the only ones that received an eighty percent view of Topeka. On the way to the top, visitors used to be able to sign the dome. President Eisenhower signed his name, and nobody has ever found it. Maybe you could be that someone.

Field Trip to the Eisenhower Museum

By WILSON WICHMAN

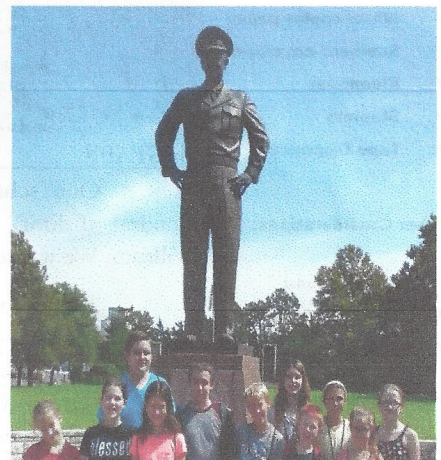

The fourth through eighth graders visited Dwight D. Eisenhower's boyhood home and museum. In an activity, we wrote down what our campaign slogan would be if we ran for President. Then we had a session where we wrote what we would do if we were President. A pizza lunch was provided by an outside organization. We learned that President Eisenhower established the highway system in 1956 which created many jobs for Americans. After the field trip, we stopped for a snack at

McDonald's. The teachers and parents who went were Chris Brinkman, Brenda Larson, Dorrene Peterson, and Tina Seward.

Do not be wise in your own eyes; fear the LORD and shun evil. - Proverbs 3:7

Computers in the Classroom

By MAX PETERSON

Computers are very important in this new technological age. Wherever you go you'll probably see some sort of technology. At Green Christian School you will find students using computers for typing, writing, and sometimes science. Last year, the 7th and 8th grades used the computers for their Kansas history curriculum. For math, students watch videos for their lessons. Students also use computers for researching sub-

jects for reports. When students are able to use computers at school, it gives them more experience for later careers. Computers will always have up-to-date information, unlike books. It will be interesting to see how technology advances in our lifetime.

Yucky Plucky

By ABIGAIL WILLROTH

“What is the pluck of a pig?” Some people would reply, “I don’t want to know,” but the answer can be quite interesting as well as disgusting. The pluck of a pig is the group of organs in the pig’s middle section which includes the kidneys, lungs, liver, stomach, and heart. How do I know this? Mrs. Larson’s science class, which includes me, examined one. The pluck was placed in a bag and taken outside to meet its disgusted and excited examiners. You

may ask, “Why were we dissecting a pig?” Well, the students had been learning about the parts of the body, and the pluck was meant to help demonstrate this better.

When we think of pigs, we often think of food, but pigs can be used for good things like organ transplants; people have had pig organ transplants. Their genetic makeup is very similar to ours. Did you know that relative to their body size pigs have small lungs, unlike us? Pigs help us in many different ways.

Field Trip to Clay Center

By ABIGAIL WILLROTH

Photo taken by Ms. Angie Bond

There was a fire of excitement blazing through Mrs. Willroth’s class. They were off to a field trip in Clay Center. It started at the Emergency Medical Service. After a few minutes of observing and learning about the huge ambulances, the kids were ready to put their knowledge into a real life perspective. They tested how comfortable the stretcher was, and checked each others’ blood pressures, and heart rates. They were able to see through the eyes of emergency care workers.

The next stop brought them to the fire department. Here they learned about the dangerous job of a firefighter. Each student tried on fire jackets and oxygen tanks.

At the Dispatch, the class viewed the huge printing press. They were able to look at one of the first newspapers ever made by the Clay Center Publishing, Company. Mr. Valentine, Editor, stated that one of every newspaper made is kept and

stored. He also showed them how they add comics.

The last stop of the field trip brought them underground at the Clay Center Power Plant. The students traveled through the “secret” tunnel that leads to the old power plant building. They looked at diesel engines and other equipment. The engines were very loud, and the students had to wear earplugs while in the building. Each piece of equipment was color coded to represent their use. The students had fun and learned much information.

Physical Education

By WILSON WICHMAN

Can you guess who won the volleyball match when the boys played the girls? P. E. teacher, Mrs. Carla Wiedmer, was playing on the girls’ team. The game started out close, but as it progressed one team pulled away. At the end of the first half, the score was 9 to 5 with the boys leading. At the end of the game, the score was 15 to 5. The boys ended up winning. It wasn’t a super close game, but everybody had fun.

Quotes From K-5

Interviewed By STAFF

Faith Willroth, five years old- “My favorite movie is *Prairie on the House*.”

Kellen Condray, six years old- “When I grow up, I want to live in a mansion, and have six kids, two dogs, and two bunnies.”

Kathryn Seward, ten years old- “My favorite food is bear meat. I remember bear hunting in Alaska.”

Knox Condray, eight years old- “I want to have a big house with a ‘67 Mustang convertible.”

1. What starts with the letter "t", is filled with "t", and ends with "t"?

2. I'm tall when I'm young, and short when I'm old. What am I?

3. What is at the end of a rainbow?

1. a teapot—2. a candle—3. "V"

Quotes from K-5

Levi Willroth, seven years old- "I love Jesus, and some people are poor, and might not know about Jesus. I don't want anyone to go to hell. I want them to go to Heaven."

Greden Dunn, nine years old- "My favorite Bible story is when Jesus duplicated the fish."

Grace Willroth, 11 years old- "My least favorite movie is *Thomas the Train*."

Ellie Willroth, ten years old- "If I could be a sound, I would be a dog bark."

Sophie Dearman, eight years old- "My favorite subject is Math, because it is easy."
